Netcam**Viewer**Monitor

View any IP-camera on your TV or Monitor at a maximum resolution of 1920 x 1080 pixels

Configurable Camera Sequence

HDMI & Composite Video Output

600+ brands

We support all big brands of IP-cameras. In total more than 600 brands and models.

up to 1080P

View every IP-camera on a monitor or TV with a maximum resolution of 1920 x 1080.

1 2 3

With the sequence mode you can automatically change between different cameras.

Simple operation of all the functionality in NetcamViewer using your smartphone, tablet or PC.

Show up to nine (9) cameras in one screen to get the total overview.

PiP

Show multiple cameras as picture-in-picture (PiP) view.

Connect NetcamViewer Wirelessly to your network with the seperate available WiFi dongle.

API

HTTP API Integration. Switch cameras and views using simple API-commands.

NetcamViewer Monitor displays all the images from an IP-camera on a monitor. Both via HDMI (cable included) or on an analogue monitor via a separate analogue cable set.

Support for all famous and obscure brands of camera by selecting the brand or by direct input of the image URL. Also supports ONVIF cameras. Maximum resolution of 1080p, depending on the brand and model of camera and available network capacity.

Applications
- Spotmonitor at the entrance of shops
- Picture-in-Picture or full-screen on a standard TV (depending on the capabilities of the TV)
- Display on an analogue monitor (requires a cable set supplied separately)

View any IP-camera on your Television or Monitor

Easy setup with your smartphone, tablet or laptop

Display of a camera on a full screen or in sequence mode, where multiple cameras are shown in sequence on a full screen. This equipment can be configured via an intuitive interface from within a browser using a PC, MAC, smartphone or tablet. Connected to the network using Ethernet. The optional WiFi dongle enables you to connect the NetcamViewer Monitor to an existing wireless network.

Can be mounted using an optional VESA-between-bracket, which is ordered separately. This bracket offers the option of permanent installation on a monitor, even if this is already mounted on a wall or ceiling using a VESA-bracket.
